

## ***THE ABSOLUTE SOUND***

Here is the article from *The Absolute Sound*, issue 161 (April/May 2006), page 26, by Neil Gader.

Curves were in evidence in the Evolution line from Italian maker **Pearl Evolution**. The speakers' dynamic drivers are essentially decoupled from their front baffles, though they remain pistonicly linear and stable thanks to a rigid horizontal pole running from the rear of the cabinets to the back of the transducer magnets. The resulting sound was boxless and electrostat-like in the mids and highs, Melding transparency with dynamism like few speakers at the show. The Evo- 203, a two-way Pearl, will retail for \$6000
